

PR 100

Outside roof

R
REYNAERS
aluminium

PR 100 is a non-insulated aluminium roof system that can be used as a terrace covering or a carport. PR 100 offers a range of rafters in different heights and widths so that high static requirements coming from snow load and own weight can be implemented without using steel reinforcements.

TECHNICAL CHARACTERISTICS

	
Style variants	SOFTLINE
Height of rafter	100 - 150 mm
Min. visible width of rafter	75 - 105 mm
Slope	5° - 45°
Glass thickness	8 - 37 mm
Glazing method	dry glazing with EPDM
